**Will Dodson : Cult Films** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Cult Films:

A must-have for every collector, fan, and anyone who ever bought a movie poster, this book and postcard package is an informative, visual feast of pop-culture iconography. The six full-color oversized post cards alone are worth the price of admission! There's something about the quirky and bizarre nature of cult films that appeals to the movie-watcher in all of us. *Cult Films* strikes that same chord, covering ground never before seen by non-hardcore cult movie enthusiasts. Taking on the weird and the fantastic, and the known and little-known gems, such as *Valley of the Dolls*, *Reefer Madness*, *Plan 9 From Outer Space*, as well as cult hits from the worlds of kung fu, spaghetti Westerns, and

blaxploitation. This great book and postcard package has a little something for everyone!
