Hooray for dancing hamsters...!By Corine Ann BarnesMost of the web sites are active, and all will keep you poking around the Net for quite a few hours. I had to share it with a friend who adores Halloween and silly stuff - it made her day (and week, and month...)! I plan to purchase another for a relative who teaches special needs children, as a creative resource.2 of 2 people found the following review helpful. Must Read for Web Wanderers!By A CustomerThis little tome is exactly as promised. Imagine the hours (days? nights?) this crazy woman must have spent prowling the dregs of the World Wide Web in order to find these gems. I'll admit to not having counted them, but even if there are only 500 instead of 501, it's worth your time to flip through and find your heart's desire. (My favorite: Derek's Big Web Site of WalMart Purchase Receipts!) The only downside? The author didn't include an e-mail address where we can send her all the other favorites she missed (for the second edition which is sure to come). But, the publisher has listed their's. I guess that is where I'll start...0 of 2 people found the following review helpful. computer wreckerBy Chris TaylorMy 10 year old son bought this book and all it did was wreck my computer with trick downloads and addware from all kinds of sights.
