Stella Hyde : Darkside Zodiac at Work before purchasing it in order to gage whether or not it would be worth my time, and all praised Darkside Zodiac at Work:

0 of 0 people found the following review helpful. Fun gift, coffee table book and a very entertaining read!By Heather DavidI bought this book on 10 years ago, and I still show it to people and have fun looking through it. It's very entertaining and doesn't require a tedious amount of knowledge on Zodiac stuff. It's a good read for singles, but it's also been humorous as a new parent to see aspects of my children's "signs". It's sure to bring a smile to the face of anyone who pages through it. I also love the thick, colorful pages that've held up to years of being passed around and enjoyed.0 of 0 people found the following review helpful. EVERYTHING YOU'VE ALWAYS DREAD HEARING ..BUT MUST KNOW!!By CustomerThis is definitely one of those books that will piss you off or anyone you read it to. Try not to read it to any of your family members/friends. Reading their sign I meant.in fact, Don't even hand it to them, because they'll probably start ripping pages out and becoming more and more irate with the excuse saying that This isn't true. Most people don't want to face the music but this author makes no apologies nor does he need to

because he accepts the ugly truth as it is. He constantly antagonizes your sign in such a way that you'll never associate it with any Sunday afternoon newspaper horoscope ever again. It's all the bad stuff the dirt the grime and the ugly the zodiac astrology signs stand for and produce. Amazingly it's all true, it's all accurate, and I appreciate the whole dark side of the zodiac, because the truth hurts and yes this book will hurt some people. Definitely NOT for the squeamish I love this book I'm giving it 5 stars. if it was possible I would give this 10 stars just the sheer accuracy and nobility this is definitely a tome I am very proud to have. 0 of 0 people found the following review helpful. Slytherins Love This Book By E. R. This is great for building characters during creative writing exercises. Gotta have those fatal flaws! It's also insightful into actual human character, but I'm a Libra, so I don't really pay attention to what this book says is my "darkside" :P The layout is kind of weird, so it's hard to browse through, but if you are using it for research like me, it's okay.

Ever wonder why the sales department never gets along with the accounting department? Or why some people always get a raise even though you deserve one more? It's because of their sun signs! This self-evident fact eludes know-it-all management, which explains why HR departments (a Libran invention) are always putting teams of incompatible astrological enemies together merely on the grounds that they all have Harvard MBAs--then they scratch their heads in wonder when the company goes into freefall. Readers will find out who goes with whom in office romances (do we really need to ask what the Aries and the Scorpio are doing in that broom closet?), why Leos are never late for work and Aquarians usually are, why you should beware of the Gemini's explanation for missing a deadline (most likely a lie), why Virgos color-code their erasers, or why Scorpios despise Capricorns (duh, that is so obvious since Caps think they should be the next V.P. in Charge of Everything). Darkside Zodiac at Work is the book for anyone who wants to find out how the rest of the zodiac intends to rig the market, move their cheese, steal their thunder, rain on their parade, sabotage their business plan, and generally ruin their workday (and how they can do it right back) then this is the book for them! They can always tell their boss it came free with the latest subscription to Forbes.
