**Darren Aronofsky : Darren Aronofsky's Noah** before purchasing it in order to gage whether or not it would be worth my time, and all praised Darren Aronofsky's Noah:

4 of 5 people found the following review helpful. MisleadingBy ashaw12While there are some gorgeous pictures in this book, it wasn't really what I was expecting. From the description I thought there would have been things like concept drawings or behind-the-scenes pictures but there was none of that.The one thing I really did enjoy besides the pictures was the bound screenplay in the back of the book.Not a bad purchase overall, but not what I was expecting and definitely not worth the price.7 of 9 people found the following review helpful. Not What You ExpectBy Savage BeastNot what I expected at all. The book was all pictures from the film and a copy of the screenplay. The pictures were very nice but no behind the scenes info at all. It would have been nicer to have the behind the scenes info. This is the first book I have considered returning but the photos are good. Try and find it on sale somewhere to make it a better value.0 of 0 people found the following review helpful. Meh- there are better books at the good will for way cheaperBy Ryan H.Bought as a gift. It was wrapped in plastic. Didn't want to open it but wanted to make sure it wasn't too 'atheist' for my very religious grandmother.At the price, I expected it to include the movie. Nope. It had very little content in it, a lot of it printed way too dark. I flipped through it for a min, it was underwhelming. I'll still give it to her, luckily with another blu ray or it wouldn't be worth the package. At the end of the book, it includes, what I think is just a partial script from the movie. Who liked the movie that much to want the script? All in all, over priced under

delivery.

The film book tie-in for what will be the most talked-about film of spring 2014: Darren Aronofsky's *Noah*, starring Russell Crowe, Jennifer Connelly, and Anthony Hopkins. Following on the heels of his successful film *Black Swan*, celebrated filmmaker Darren Aronofsky turns his talent to the epic big-budget biblical tradition with his film *Noah*, starring Award-winners Russell Crowe, Jennifer Connelly, and Anthony Hopkins, as well as Emma Watson, Logan Lerman, and Ray Winstone. Russell Crowe stars as Noah, a man chosen by God for a great task before an apocalyptic flood destroys the world. The film touches on themes found throughout Aronofsky's work—the dichotomy of life/death, inner turmoil, otherness—presented with Aronofsky's singular and compelling aesthetic. *Noah* is an extension of Aronofsky's otherworldly sensibilities; it showcases art from the film and the director at work and is a must-have for fans of Aronofsky and of cinema everywhere.

About the Author Darren Aronofsky's directorial debut won the Director's Award at the 1998 Sundance Film Festival, as well as the Independent Spirit award and the Open Palm. His most recent films—*The Wrestler* (2008) and *Black Swan* (2010)—earned countless accolades and multiple nominations; *Black Swan* won an Academy Award.
