Dr. Gyora Benedek : Hidato fun 6: 203 New Logic Puzzles (Volume 6) before purchasing it in order to gage whether or not it would be worth my time, and all praised Hidato fun 6: 203 New Logic Puzzles (Volume 6):

0 of 0 people found the following review helpful. Attention, Puzzle Addicts!...By Bindy Sue FrnknschteinHIDATO FUN 6 continues Benedek's wonderful series of puzzles. If you enjoy sudoku, or other such puzzles / games, then HIDATO should be a new adventure. It's basically the creating of a trail of numbers on a grid. Certain numbers are given as clues, and the fun begins! Starting w/ very simple puzzles to get you going, they accelerate through MODERATE, HARD, VERY HARD, and I DARE YOU (these are confounding and difficult for me)! Highly

I have eagerly purchase Dr. Benedek's new books as soon as they become available. I love having brand new Hidato puzzles to solve. Please note: the "I Dare You" puzzles are....HARDATO!!! In other words, a little above my pay grade. But all the other puzzles are right up my alley.All Hidato puzzles have only one solution. They are fun, but can be very tricky. If you are patient, and can resist the temptation to guess, you are on the right track!0 of 0 people found the following review helpful. Five StarsBy Donald E. WhiteLove these puzzles.

"Now a new number puzzle called Hidato is poised to steal Sudoku's spotlight." Puzzle Master Scott Kim, Discover magazine. "Beguiling number puzzles that offer a change of pace from Sudoku. . . . Amusing and engrossing." Kirkus Reviews. "Instead of the arithmetical deduction of Sudoku, Hidato . . . , is more of a workout for spatial reasoning skills; the trick is to figure out the right path through points on the grid from among all the possible pathways." Kirkus Reviews. Hidato is a pure logic puzzle thats easy to learn but difficult to master, making it the perfect challenge! Like Sudoku, Hidato features the compelling combination of easy-to-follow rules and increasingly difficult puzzles. Each Hidato puzzle starts with a grid partially filled with numbers. To succeed, just finish filling the grid with consecutive numbers connecting horizontally, vertically, or diagonally. It sounds so simple. Why not give it a try, and see for yourself why Hidato is rapidly becoming the new brain teasing craze!Challenging, exciting and fun, Hidato number sequence puzzles can be solved using 100 percent logic. Theres no math or guesswork required. All you need to reveal the secret solution is careful thought and lots of determination! Each volume of the Hidato fun series presents 203 brand-new Hidato puzzles at five difficulty levels, giving hours and hours of fun and entertainment. And now, two bonus "I dare you" puzzles to wreck your mind. New volumes are made available on the first of each even month (Feb., April, June, Aug., Oct. and Dec.). Hidato is featured worldwide in magazines, newspapers, books, online, mobile and more. Because Hidato helps develop logic skills, the Davidson Institute of Science Education, the educational arm of the world-renowned Weizmann Institute of Science, recently granted Hidato puzzles to outstanding kids participating in their math and science online programs.

About the AuthorDr. Gyora M. Benedek is a prominent computer scientist. In his spare time, he invents and develops games and logic puzzles, including the worldwide hits Lights Out, NimX and iTop. Dr. Benedek invented Hidato while scuba diving in the Red Sea.
