If you have very poor eyesight but still want a challenge from your word search puzzles then 'Hidden Words in Very Large Print' is the book for you. Formatted in 24 point Verdana font, the words are arranged horizontally, vertically and diagonally and can read backwards and forwards and may, at times, overlap. Add to that the fact that some of the words you will never have encountered before - because I made them up - and you have a puzzle book which will keep you engaged, and entertained, for many an hour. As someone with poor eyesight myself I wanted to create a puzzle book for people who don't believe that extra large print has to equate to super easy. A wide variety of topics is covered, including some words in foreign languages, and there are 1500 words to search for. Please note that the font

inside the book will be larger than the Look Inside facility on the website makes it appear. This print-on-demand book has been formatted to provide you with the maximum number of words to search for while remaining easy to read. This book will make the perfect gift for a friend, or relative, who loves word search puzzles and who has poor eyesight. Whether you call them word seeks, circle a word, word finder, word squares, word grids, find a word or word search it's still the same heap of fun. L.D. Crowie publishes puzzles under his own name and under the Puzzled Zebra Imprint. These puzzle books are only available on Amazon.
