Bobby Mercer : How Do You Light a Fart?: And 150 Other Essential Things Every Guy Should Know about Science before purchasing it in order to gage whether or not it would be worth my time, and all praised How Do You Light a Fart?: And 150 Other Essential Things Every Guy Should Know about Science:

1 of 1 people found the following review helpful. Loved itBy Orville TurneyVery informative.Very entertaining.Easy reading.Short, but right to the point answers for questions I have asked in the past.HOWEVER, what I found more amusing was turning a page, reading the next question and thinking.....YEAH, how DOES that work or how DO they do that.0 of 0 people found the following review helpful. A Manly Man's Book ** Insert Grunt sound here***By Sue

SheAfter my husband read this book from cover to cover, I found myself reading this at the beach. It is filled with quick 1 to 2 page tips on all sorts of information from "How to hot wire a car", "Why is there a metal rack in your microwave" and of course the obvious "How do you light a fart?" Funny, interesting fluff. If your man isn't much of a reader but more of a skimmer, this is the book for him. Who know's, you might pick up a thing or two. 1 of 1 people found the following review helpful. Great BookBy Kristofor NelsonIt was so funny!!!!!! A must read!!!!!! You thought you learned everything in high school and college!!! This book is more for males rather than females. It still will stay on my bookshelf on my Kindle!!!!

Fireworks and grenades. Grills and campfires. Burps and farts.Men get a kick out of things that go boom, things that cook with fire, and all forms of bodily gas. What they might not know is that science is what makes it all happen. This book answers all the questions guys have about their favorite topics, such as:How do you make a Lifesaver spark?How do you hotwire a car?Why do kegs float?What is PMS?Why doesn't a cell phone work in metal buildings? Serious science mixed with outrageous humor, this book promises guys the need-to-know info on sports, cars, technology, women, bodily functions, food, and more!

About the AuthorBobby Mercer (Rutherfordton, NC) has twenty years of experience as a high school physics teacher. Bobby received his BA in science education from the University of Central Florida and his MA in physics education from the University of Virginia. He is the author of Smash It! Crash It! Launch It!: 50 Mind-blowing Eye-popping Science Experiments; The Leaping, Sliding, Sprinting, Riding Science Book: 50 Super Sports Science Activities; and Quarterback Dad.
