I would add that most songs in this series are solid stand-alone solos, and also feature beautifully scored teacher duets, which afford the students weekly opportunities to make live music with another musician!! The teacher duets are in the tradition of the classics (often based on specific and named classical pieces), jazz, and eclectic accompaniment styles, so the student's musical taste is further developed. Slam dunk!One more note about duets: teachers, our part is a tad more complicated than the accompaniments, say, in the same level of Faber. I find a quick run through the night before lesson day is helpful (but so worth it!)0 of 0 people found the following review helpful. CD was worthless - too much added music overlaying the piano, lesson content poor.By FalconSoaringCD was worthless - too much added music overlaying the piano. Lots of wasted paper, little in the way of lessons. The John Thompson's series is much better.1 of 1 people found the following review helpful. Excellent book for learning pianoBy Vinni2006Item as described. Excellent book for the beginners as well as intermediate learners. My son loves this book.

Beautifully presented and intelligently paced, the Lesson Books combine unusually attractive music and lyrics. The books feature note reading, rhythm reading, sight-reading and technical workouts. Each piece on the CD was recorded

at a performance tempo and a slower practice tempo. The music from this book is available in the Piano Maestro app that's downloadable at <http://app.appsflyer.com/id604699751?pid=webc=alfred>.
