Great for Teachers and Speakers By Robert Cunningham I have been a professional teacher/trainer of technical materials for more than 30 years and have always used magic in my teaching. I know magic grips the attention of students like almost nothing else! Ed Rose has put together an easy to understand book that teaches magic

and, more importantly, how to use magic to illustrate the content you are trying to teach. The magic he teaches is simple and easy to perform even if you have no experience with magic. If you are a competent amateur or professional magician, the magic is not new or impressive. But, do not pass this book by for that reason. The real benefit of this book is how Ed uses magic to teach Human Resources topics. Any teacher who reads this book, and applies the general principles that Ed demonstrates to their subject matter will have a much more dynamic and engaging classroom presentation!

Thumbs up to Ed for making a seeming mysterious process and technique available to the average trainer, speaker and educator.
