Some of the instructions were unclear and there were not enough specific puzzles to understand the logic. Still there is a lot to work with and I will persevere. not quite mensa

Sudoku designers the world over will weep and gnash their teeth at the revelations in this comprehensive guide to cracking the addictive puzzles--but solvers will find it absolutely invaluable as they seek to improve their skills. Even experts don't know all these tricks: hidden pairs, naked pairs, X-wings, jellyfish, squirmbag, bivalve and bilocation graphs, and chains, plus the exclusive Gordonian logic methods that turn the toughest puzzles into a breeze. There are hundreds of sudoku to practice on. A special addition is a reprint of the very first sudoku ever published!

This book offers the most detailed advice we've ever seen ... on how to solve sudoku puzzles.... Highly recommended for all sudoku fans.--Games magazine
