From Alfred : Rachmaninoff -- Selected Works (Alfred Masterwork Edition) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Rachmaninoff -- Selected Works (Alfred Masterwork Edition):

2 of 2 people found the following review helpful. Great bookBy A WComes with a few paragraphs for each piece which give some performance notes. For the popular Prelude in C#, comes with the two versions of the first 13 measures: one for pianos without sostenuto and one for pianos with it. Shows the sostenuto pedal markings. Very convenient. All other pieces have full pedal notation -- and it is clearly stated that the pedal notation is a starting off point for learning, but they should be eschewed in favor of your own interpretation and environment.I bought the "collectible" version from imagine-this which has comb binding. It costed a little bit more but it was totally worth it for the ease of page turning.0 of 0 people found the following review helpful. Good book. Arrived promptly.By
